

\$NOVUS — Disclaimer

\$NOVUS is a community token. It is not a share, a securities offering, or a claim on any income or asset, and its price can go to zero. Nothing on this site is investment, financial, legal, or tax advice, or a recommendation to buy, hold, or sell anything. Crypto-assets are volatile and risky. Commit only what you are fully prepared to lose. The structural commitments described here (locked liquidity, vested team, a treasury that moves in disclosed steps) are about conduct and transparency; they are not, and cannot be, a guarantee about price. The regulatory treatment of crypto-assets is developing, including under the EU's Markets in Crypto-Assets framework (MiCA); this is a community document and not an offer or solicitation in any jurisdiction where that would be unlawful. Always do your own research and verify the official contract address before transacting. \$NOVUS is not affiliated with, endorsed by, or connected to Solana, Raydium, Streamflow, or any other project named here.
